Jumping around on a fixed screen, avoiding traps and projectiles in order to pick up barrels or balloons until a counter fills is not my perception of a fun game.. An okay poker simulator with a flimsy story and some town management. The problem is the extraneous stuff gets in the way of the poker without adding anything. There are better options if you want to play poker.. If you can't tell from the hours played on this game, I recommend it. I enjoyed the original Train Valley game and was quite skeptical with the 2nd one with how different it was. But the game-play with resource and time management is very fun, even more fun than the first one. Now I wouldn't have this many hours playtime if it wasn't for their workshop which allows you to make and play your own levels along with other peoples levels. It's really fun and interesting to see some of the wacky and sometimes very challenging levels that they create. Even though the full game isn't out yet, still worth checking out.. I loved playing this game when I was younger and I still do. Despite some bugs on the PC port, I recommend it.

If you're having troubles with the jumping portions, turn Vsync on. Yeah, the fps will decrease, but I'd rather be safe than sorry.. Both are good, a bit Risky and Tricky to use, Iru is like Altenative version of Marc with powerful passive you can use her to choose wins or Stars Norma

Mira also good if you like stabbing people from behind, and spamming traps

Sweet and Cute Voice, Decent BGM. A great little puzzle platformer with a great sense of humour. Level editor will make this game have a tonne of replay value and extra content. Looking forward to the full release.. Really enjoying it so far. Its a little obtuse, in that it doesn't explain very much at the start, but the level design is actually quite masterful in how it introduces you to each new enemy and concept without saying a word.

Its not mind-blowing, just rock solid stuff, and for less than the price of a really cheap bacon sandwich (mmmm bacon) I have no complaints.. By King George's beard, what is this nefarious necessity called Strange Brigade?!

If that amused you, then you'll like this game.

For everyone else-

Its pretty much a straightforward shooter, with the setting being something out of one of the Mummy or Indiana Jones type movies. It IS very refreshing, and fun, as its not aliens or another space station or the like. 1930's archeology, with weapons to match the setting.

Graphics are beautiful, the gameplay is good, it runs smoothly, no bugs that I've seen. On normal difficulty, it is hard, but not so hard that you can't finish it. Definately more fun when you play it co-op with a friend or more, I'm not sure I'd like it as good single player. Its worth the price, I got pretty much exactly what I expected. A well done game, that has provided plenty of fun and entertainment.

Oh, and for the love of pete and Darwins spectacles, the narrator is hilarious!. is anyone still playing this game. I don't even own this game???? how can I write this?

Good game, nice art style, I liked it alot. Some puzzles were challenging.. You can throw a bowling ball and hit the pins. Basically that is it, no entertainment value at all. I would like to see a good bowling game, but this looks really beta or even alpha at best. I guess this could have some potential to become something more and I dont want to be the bad guy giving thumbs down, so keep on developing. By the way, it is not a 250 GB storage requirement as the specs says, but merely 25 MB.... game will not load. picture just keeps flickering and cursor freezes. very good game to spend ur time. this version does not allow you to use a dj controller and is limited in otherways as well.

do not buy this unles you like trying to get everything done with a mouse, just save up for vdj pro

this was a waste of time and i wish i had not bought it

is it possible to get a refund?. Nice weapons. Good package! Easy to use. I recommend this.
